

Rethink Tomorrow

novozymes 

BG Max™ C

Cellulase, Liquid

BG Max™ C is a basic cellulase targeting cellulose-rich substrates for both agricultural and industrial use. It is a first choice for improving conventional biogas processes. The product performs well as a blend with other enzymes and/or process additives.

Why consider Enzymes for Biogas production?

Increased biogas yield

Lower viscosity

Higher flexibility in choice of substrate

SPECIFICATIONS

Key application parameters

Application range

COMMON SUBSTRATES

-  Corn and whole-plant grain silage
-  Sugar beet pulp
-  Cellulose and hemicellulose-rich substrates

FORMULATION

Blends well with other **enzymes** and/or process additives.

About Novozymes

Novozymes is the world leader in biological solutions. Together with customers, partners and the global community, we improve industrial performance while preserving the planet's resources and helping to build better lives. As the world's largest provider of enzyme and microbial technologies, our bioinnovation enables higher agricultural yields, low-temperature washing, energy-efficient production, renewable fuel and many other benefits that we rely on today and in the future. We call it Rethink Tomorrow.
