

Rethink Tomorrow

novozymes 

BG Max™ BE

Beta-glucanase & Pectinase, Liquid

BG Max™ BE is a highly efficient beta-glucanase, with substantial pectinase activity, targeting grass or sugar beet-related substrates. Also works well in combination with cellulases and a very good choice when trying to degrade unknown plant materials.

Why consider Enzymes for Biogas production?

Increased biogas production

Lower viscosity

Higher flexibility in choice of substrate

SPECIFICATIONS

Key application parameters

Application range

COMMON SUBSTRATES

-  Grass inclusion
-  Sugar beet and cassava pulp
-  Mixed food waste

FORMULATION

Blends well with other **enzymes** and/or process additives.

About Novozymes

Novozymes is the world leader in biological solutions. Together with customers, partners and the global community, we improve industrial performance while preserving the planet's resources and helping to build better lives. As the world's largest provider of enzyme and microbial technologies, our bioinnovation enables higher agricultural yields, low-temperature washing, energy-efficient production, renewable fuel and many other benefits that we rely on today and in the future. We call it Rethink Tomorrow.
